SHRUTI KUMARI

+91-6202484589 | shrutikumari18032005@gmail.com | LinkedIn | GitHub | LeetCode | Portfolio

SUMMARY

Aspiring Software Engineer with strong knowledge of Data Structures, Algorithms, OOPs and Full Stack Development. Proficient in C++, Python, JavaScript, React.js, Node.js and database management. Developed many scalable web applications, RESTFUL APIs, and AI-Powered solutions through practical projects.

EDUCATION

SHOBHIT INSTITUTE OF ENGINEERING AND TECHNOLOGY CGPA: 8.70/10.0(till 6th sem.) Meerut, Uttar Pradesh

Bachelor of Computer Science and Engineering in Data Science Aug 2023 - June 2027

PROJECTS

1. SYNEX GEN | React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT– source code July 2026 - Present

- Developing an **AI-Powered Career and Technology Platform,** connecting students with internship opportunities, hackathons, tech events, and career development resources through 7+ core modules.
- Implemented frontend and backend components using React.js, Tailwind CSS, Node.js and integrated MongoDB for database management and also JWT-based authentication for secure user access.
- Integrated interactive community features, including Q&A, Gaming, Quiz Arena and SYNEX GEN AI Assistant for any assistance and to encourage student engagement, technical learning, and professional growth.

2. GESTURE & FACE CONTROL SYSTEM | Flask, Python, Media pipe, OpenCV – source code Oct 2025 - Dec 2025

- Developed a Gesture & Face Control System using Python, OpenCV, MediaPipe, and Flask, through a webcam for hands-free computer control and interactive user experiences.
- Implemented **10+** hand gesture-based tasks to control system functions, including application control, screenshot capture, and other system controls across **3+** categories of actions.
- Integrated **3+** trained facial expressions with computer vision-based gesture recognition with a Flask web dashboard to enable real-time**,** responsiveness.

3. AI POWERED CHATBOT | Python, Flask, API Integration – source code Apr 2026 - May 2026

- Developed an AI Powered Chatbot using APIs, Python and Flask web-based interface for user interaction.
- Implemented **NLP**-based text processing to understand and classify user queries, generate relevant responses, and optimize real-time request handling for smooth and efficient chatbot interaction.
- Integrated Flask backend APIs with the frontend to enable real-time chatbot communication, handling multiple user queries and ensuring a smooth, responsive user experience.

SKILLS

Programming Languages: C++, Python, SQL, JavaScript **Databases:** MySQL, MongoDB

Core CS: Data Structures & Algorithms, OS, DBMS **Data Analytics**: MS Excel, Power BI

Frontend Technologies: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend Technologies: Node.js, Express.js, Flask, Django, RESTful APIs

Data Science & AI: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, ML, NLP, Deep Learning

CERTIFICATIONS

- Full Stack Web Dev. Bootcamp covering React.js, REST APIs, Database, Django, Docker. Certificate link
- Bootcamp covering Data Science, Machine Learning, Deep Learning, and NLP on **Udemy**. Certificate link
- Introduction to Data Science from Cisco Network Academy covering basics about data. Certificate link

ACHIEVEMENTS

- Winner of Internal Smart India Hackathon 2025 among 30+ teams and 180+ Participants. Certificate link
- Selected for the **Final Pitch** in *Aarambh'26 -The Innovation Challenge* by **DMS, IIT Delhi.** Certificate link
- Shortlisted for the Offline Grand Finale of **HackCraft3.0** at GITM Gurugram. Certificate link
- Participated in Bhartiya Antariksha Hackathon 2025, coordinated by ISRO (Online Mode). Certificate link
- Rewarded by a special **Gift Box** as a **Token of appreciation** in TenzorX 2026 National AI Hackathon.
- Solved **85+** Data Structures and Algorithms problems on LeetCode to strengthen problem-solving abilities.
